10, Motherboard Connection

if the fan not work, exchange wiring terminals, the red wire is connect to +, the black wire connect to -

if the LCD not work, pls exchange wiring terminals

Caveat, when the fan not work, pls dont heat the nozzle and print.

When out of factory, we have flashed the firmware and test the motherboard, guarantee the motherboard is no problem.

Important Note

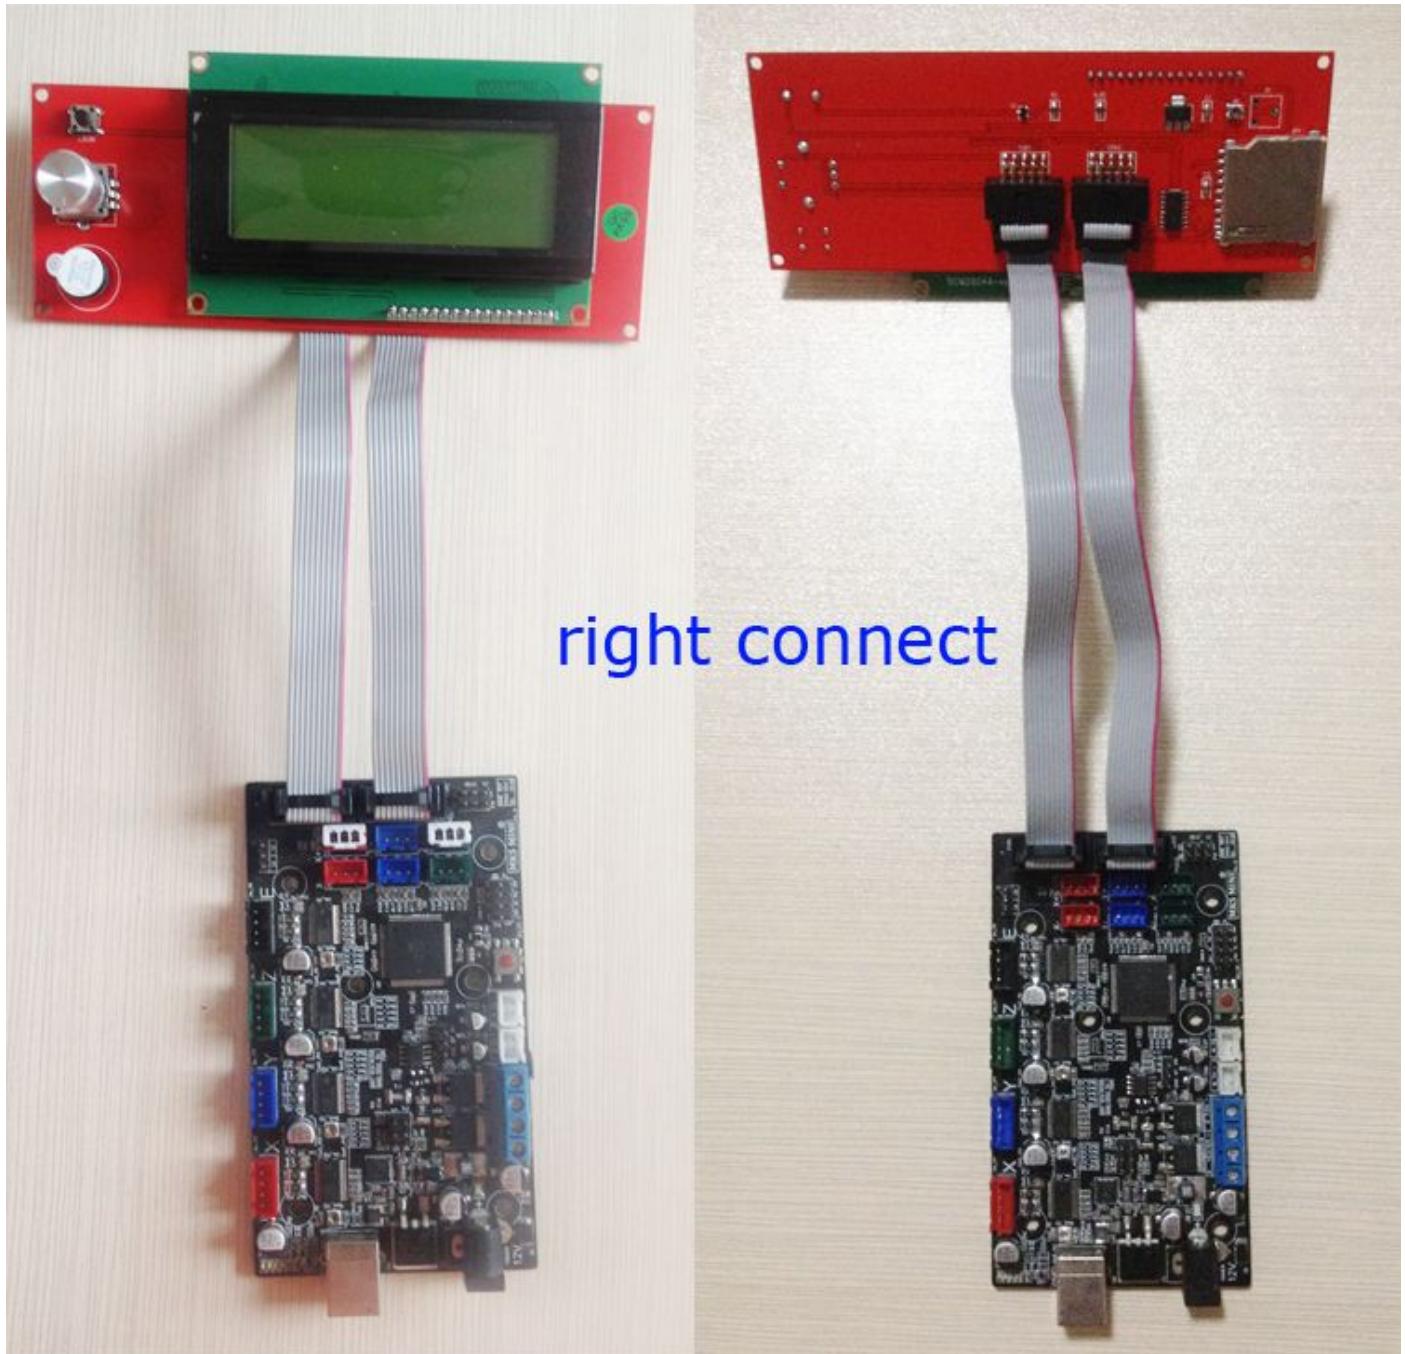

Keep right lcd line connect to motherboard, or will not flash firmware.
